BENEFITS OF BON ROOFS

* A cool roof can benefit a building and its occupants by: Reducing energy bills decreasing air conditioning needs.

Improving indoor comfort for spaces that are not air conditioned

* Decreasing roof temperature, which may extend roof service life. Beyond the building itself, cool roofs can also benefit the environment, especially when many buildings in a community have them.

Cool roofs can:

* Reduce local air temperatures (sometimes referred to as the urban heat island effect)

* Lower peak electricity demand, which can help prevent power outages.

* Reduce power plant emissions, including carbon dioxide, nitrous oxides and mercury by reducing cooling energy use in buildings.
